 GitHub  LinkedIn  CodeForces  LeetCode  HackerRank

Technical Skills

Programming Languages: Python (AI/ML, scripting), Java (Advanced – DSA, OOP), JavaScript, TypeScript, C, C++
Data & Big Data: Apache Spark (fundamentals), Apache Airflow (learning), Pandas, NumPy, Scikit-Learn, TensorFlow
Databases & SQL: PostgreSQL, MySQL, MongoDB, Oracle Database
Cloud & DevOps: AWS (EC2, S3, IAM), Docker, CI/CD with GitHub Actions, Linux Server Environments
Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, Flask, Modular Architecture
Full-Stack & Architecture: MERN Stack, Microservices Fundamentals, Modular Development, API Integration
Tools & Version Control: Git, GitHub, Postman, VS Code, Jira, Figma
Competitive Programming: Java-DSA, Codeforces, LeetCode, HackerRank — daily challenge series (Day 183+)

Education

B.Tech, Computer Science Engineering

2023 – Present

Vellore Institute of Technology, Bhopal

CGPA: 8.0

Experience

Software Development Intern

Apr 2025 – Jun 2025

Nidavellir Software Pvt. Ltd.

- Configured staging and production environments for backend deployments on cloud infrastructure.
- Debugged runtime and deployment issues across environments using structured Git workflows and CI/CD pipelines.
- Contributed to release stability via version control best practices and structured deployment procedures.

Freelance Full-Stack Developer

2022 – Present

- Designed and deployed full-stack applications on cloud-hosted environments (AWS EC2) with secure JWT authentication.
- Handled complete deployment cycles including production debugging, server-side issue resolution, and environment configuration.

Projects

Father's Advice – AI-Driven Mentorship Platform

React.js, Python (Flask), AWS, TensorFlow

 [GitHub](#)

- Built scalable mentorship system with async mentor–mentee matching using weighted bipartite algorithm and cloud-based scheduling; directly aligned with data pipeline and prototyping work.
- Deployed ML model on AWS with Python backend for real-time recommendations.

HYtrade – Cloud-Deployed Trading Platform

Node.js, Express.js, MongoDB, AWS EC2, Docker

 [Live](#) —  [GitHub](#)

- Deployed backend on AWS EC2 in Linux with secure config, Docker containerization, and JWT-based role access control.
- Designed modular REST API architecture optimized for maintainability and horizontal scalability.

Smart Hospital AR Navigation System

React Native, Unity3D, ARCore, BLE, PostgreSQL

 [GitHub](#)

- Built AR-based indoor navigation for large hospital campuses with hybrid positioning, real-time routing, multi-lingual accessibility, and emergency SOS tracking.
- Designed structured PostgreSQL schema and optimized API communication for reliable data flow.

Competitive Programming & DSA

- Running daily public DSA challenge series (#DrGViswanathanChallenge) on LinkedIn — Day 183+ — solving HackerRank, Codeforces, and LeetCode problems in Java and Python; topics include arrays, graphs, DP, trees, and greedy algorithms.

Certifications

Co-Author Certificate — Springer International Conference (NEXGCI-2025), Bennett University

Oracle Cloud Infrastructure 2025 — AI Foundations Associate

AWS Certification Course — Cloud Computing Essentials

Introduction to Machine Learning — NPTEL (Elite)

Google Networking Fundamentals — The Bits and Bytes of Computer Networking

Google IT Support
